

Customize the VL50 with accessories to help improve event coordination response time.

Event planners can stay in touch with all services with the VL50 while the light crew can be separate by channel. It's perfect for event planners, coordinators and speakers. Save the AV technicians, loading crew and security team steps. Give the food, catering and entertainment staff more time for good service.

Event Coordination

You can stay in touch with the trade show setup crew while finalizing luncheon arrangements with the caterer. The entertainment group or speakers can be cued from the greenroom for flawless timing. Plus, audio visual support staff can be summoned at a moment's notice for setup and tear down or to run a replacement adapter cable for the multi-media presentation in the Ballroom. Anything that must be done to keep the presentation flowing smoothly can be accomplished more quickly when communication is as easy as the push of a button.

Great Reasons...

Smart

Increase customer service and satisfaction by connecting your staff.

Cost Effective

Helps maximize job shift productivity with immediate communication.

Simple

Easy for staff to use, 1-to-1 or group communication at the touch of a button, great for high employee turnover industries

Safe and Secure

Enhance your team's coordination and response time when a disturbance, accident or emergency occurs.

Built for Business Use

Built to withstand everyday wear and tear featuring 56 business exclusive frequencies.

FCC License Required: VL Series™ Business two-way radios operate on radio frequencies regulated by the Federal Communications Commission (FCC). In order to transmit on these frequencies, you are required to have a license issued by the FCC.

For questions regarding FCC license contact the FCC at: 1-888-CALL-FCC, 1-888-225-5322 or visit <http://www.fcc.gov>
